

SAFETY LOCKS

Description

Security fasteners for fixings.

Effects and benefits

- Magnet: the locking button is quick and easy to attach. It is immediately locked as soon as it is inserted into the metal rod. It can only be opened with the magnetic key, thus preventing uncontrolled opening of the restraints by the patient or by unauthorised persons.
- Ironclip: Stainless steel, resistant and maximum security. Can be opened with a 50 cent or 1 euro coin.

Composition

- Magnet: Consists of a button, a metal shank and a magnetic key.
 - Ironclip: Stem-monoblock in turned stainless steel with groove.
 - Button: turned stainless steel monoblock with grooves.
- Hook: one-piece stainless steel thread.

Maintenance

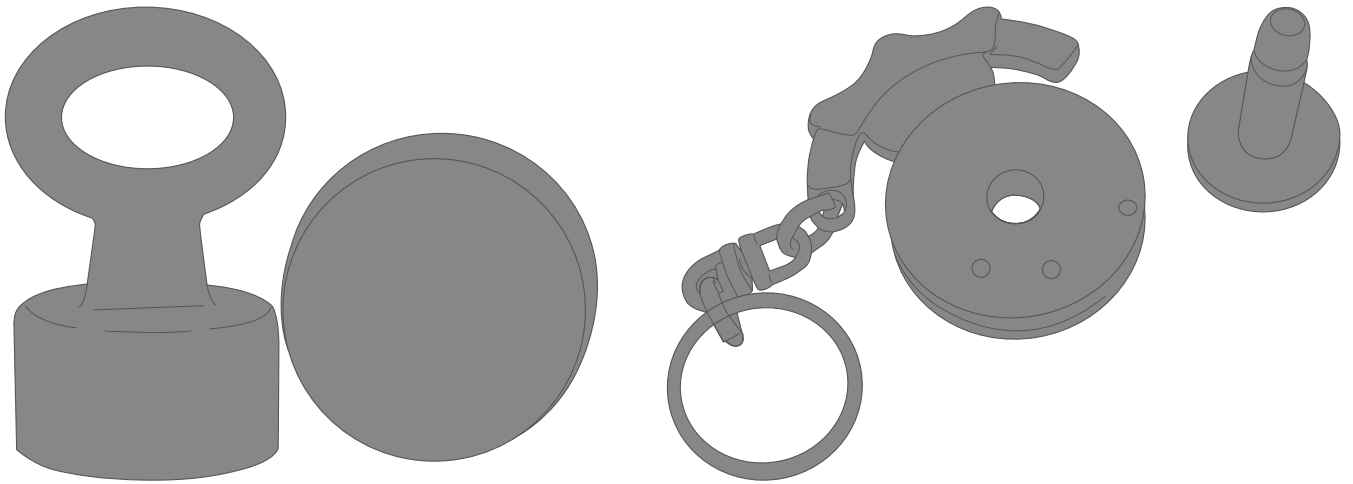

No maintenance is required.

Warranty

The warranty period is two years from the date of purchase. This warranty does not cover normal wear and tear of the product and does not replace legal warranties. Please contact the company's quality department in the event of an incident in order to resolve it.
