

CRANEAL PROTECTION UBIO CAP

Description

The UBIO CAP head protection helmet is individually adjusted to the user due to our customised production. Thanks to the technology we have used in its manufacture, we offer the best customised solution.

The materials we use in the manufacture of the helmet provide lightness and impact absorption to the user. We protect the frontal and occipital area of the skull to a greater extent due to the greater risk of impacts in this area.

Effects and advantages

- Adjustable to the shape of the head
- Available colours: black and navy blue
- Double shock absorbing protection due to the materials used in its manufacture Polyethylene foam and EVA.
- Thickness of protection: In the front and occipital area there is a thickness of about 4 cm (3 cm of polyethylene foam +1 cm of EVA material). In the side area there is a thickness of 2 cm (1 cm of polyethylene foam +1 cm of EVA).
- Net weight: 196 gr

Composition

Padding: Polyethylene foam and breathable perforated EVA material. Covering material: Leatherette.
